The Sierra College Math Department and the New Legacy Committee welcome the addition of a new and exciting way to learn Elementary Algebra. With special attention given to the creative application of ethnomathematics, the New Legacy Math A course is designed to connect culture with the learning of algebra.

You now have the opportunity to excel in a college math course that includes the historical traditions and sociocultural experiences of Latino/a, African American, and Native American/Alaska Native cultures as related to math.

To enroll in this course, visit the Counseling Department or call (916) 660-7400 for a Counselor appointment.
